

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification as follows:

[0013] FIG. 2 shows an enlarged section through the door compartment in FIG. 1 along line II-II; [[and]]

[0014] FIG. 3 shows an enlarged detail of the door compartment[[.]] ; and

After Paragraph 0014, insert the following paragraph:

FIG. 4 shows a refrigerator in accordance with embodiments of the invention.

[0015] FIG. 1 shows, in a perspective view, a door compartment for a refrigerator according to the invention, with a drawer 1 integrally injection moulded from plastic. FIG. 4 shows drawer 1 positioned on a door 22 of a refrigerator 20 having a heat-insulated housing enclosing an inner space 21. Drawer 1, open on its top, has a bottom 2, a rear wall 3 facing towards the door of the refrigerator when assembled, a curved front wall 4 facing towards the inner space and lateral walls 5, each of which is divided by a step 6 into a section adjacent to the refrigerator door and a section remote from the refrigerator door. When the door compartment has been assembled vertical ribs formed on the inside of the refrigerator door rest against the sections of lateral walls 5 close to the door, and projections formed on the ribs engage in grooves 7 of the sections close to the door to support the door compartment, which grooves are open at the bottom and closed at the top.
